OVERVIEW

Senior Software Engineer with 5 years of extensive experience implementing large back-end systems. Passionate about innovation, efficiency, and automation. Recognized for team work and technical capability.

EXPERIENCE

• Opus

Pune, MH

Senior Software Engineer

Feb 2022 - Present

- Developed framework for **Audit Logging**, which lead to intercept and log every API request in available micro-services.
- Streamlined features related to Software Security Framework (SSF) such as **Data Encryption**, Data Masking as per the user permissions.
- Implemented **Event Logging** framework which is used in all micro-services, it is used to raise events for important user actions, it supports explicit as well as implicit event logging mechanism.
- Awarded with “**Spot Award**” for quality of work.
- Developed **secure application modules** using code analysis tool like SonarQube / SonarLint.

• Cerence

Pune, MH

Software Engineer

May 2021 - Feb 2022

- Built **data extraction utility** which takes chunks of data from JSON document and stores it in Spreadsheet.
- Developed features in the Cerence Natural Language Processing Server (**NLPS**) following an Agile Scrum process.

• Netcracker

Pune, MH

Software Engineer

Mar 2021 - May 2021

- Worked with the senior software developer to understand the product and technologies used.
- Modelling of network devices into logical entities.

• Amdocs

Pune, MH

Software Developer

Oct 2017 - Feb 2021

- Developed a **RESTful web service** to handle data transmission between in-house application and DNS management application for registering DNS addresses.
- Streamlined and **automated the deployment task** on Linux using Ansible and shell script.
- Awarded with “**Spot Award**” by manager for outperforming the critical tasks.

PROJECTS

- **Hotfix Search Application:** Conceptualized and developed a web application to explore historical hotfixes provided over a period, which was previously maintained in Excel format. It helped in achieving a 90% reduction in efforts for manual tasks.
- **Leave Management System:** Created an application to manage the employee leaves. Streamlined the logging process. Which has resulted in 70% increased efficiency to track the historic leaves.
- **Hotfix Download Utility:** Reduced 50% efforts by creating a web application to download a set of hotfixes from Windows NFS. Using this tool users can download set of hotfixes in a click.

SKILLS

- **Languages:** Java, SQL, JavaScript **Technologies:** AWS, Git, Docker, Kubernetes, Maven, Micro-services
- **Frameworks:** Spring Boot, Spring Cloud, Spring Security, Spring AOP, Hibernate, Angular
- **Tools and Other:** Jira, JUnit, Mockito, Data Structures, Algorithms, UNIX, Shell Scripting, Tomcat, WebLogic, Log4j, Oracle

EDUCATION

• Savitribai Phule Pune University

Pune, MH

Bachelor of Engineering in Computer Science

June 2017
