EXPERIENCE

Cerence

Software Engineer

Pune, India

May 2021 - Present

- Helped build a java application for data extraction task which takes data from JSON and stores in Excel.
- Design, develop, implement, and support new and existing features in the Cerence Natural Language Processing Server (NLPS) following an Agile Scrum process.
- Test and deploy docker images to Kubernetes.

Netcracker

Software Engineer

Pune, India

Mar 2021 - May 2021

- Modelling of network devices into logical entities.
- Agile development using Jira, Jenkins, SVN.
- Worked with senior software developer to understand the product and technologies used.

Amdocs

Software Developer

Pune, India

Oct 2017 - Feb 2021

- Developed a REST API using Java for one of the major Telecom and Media company in USA, achieving seamless communication between the existing on-prem application and DNS management application.
- Streamlined and automated the deployment task on Linux using Ansible and shell script.
- Awarded with "Spot Award" by manager for outperforming the critical tasks.
- Analysed microservices logs via using ELK Stack - Elasticsearch, Logstash, and Kibana.
- Used Kubernetes for deploying, managing, and scaling Docker containers.

PROJECTS

Hotfix Search Application (May 2020)

- Conceptualized and developed a web application to explore historical hotfixes provided over period, which was previously maintained in Excel format, achieving an 90% reduction in efforts for manual task.
- Built using Spring Boot, MongoDB, and JSP.

Leave Management System (Oct 2019)

- Created an application to manage the employee leaves. Streamlined the logging process. Which has resulted in 70% increased efficiency to track the historic leaves.
- Used JSP for frontend, Spring Data JPA, Spring Boot for backend service and MySQL as database.

Hotfix Download Utility (Jun 2018)

- Reduced 50% efforts by creating web application to download set of hotfixes from Windows NFS.
- Used JSP and Bootstrap for frontend, Servlet for backend service.
